

## **Instructions for Art Files**

### Vector Art for Cut Vinyl Lettering & Graphics:

Save files as Adobe Illustrator (.ai) version CS2 or earlier. All text should be in outline format by “creating outlines” from the tool bar. Artwork should use fills only, do not use strokes. Placed images cannot be used for cut vinyl.

### Rastor Art for Full Color Digital Images:

Save files as Photoshop TIFF (.tif) using CMYK mode. Resolution should be 150 ppi minimum at the full image size it will be printed. We can use JPEG (.jpg) files and Bitmap (.bmp) files, but image quality may suffer. Adobe Illustrator files set up for full color print may use strokes and placed images.
